How can Hosts manage Pods?

1. In the menu bar select:
   - “Pods”; and
   - “Manage Pods...”.

2. The following dialogue box will open up.

3. Hosts are now able to do one of the following:
   - delete pods by selecting them from the list, and clicking “Delete”.
   - rename a pod by selecting it from the list, and click “Rename”.
   - locate all unused pods by clicking “Select Unused”. Any unused pods are highlighted in the list on the left. Click “Delete” if you want to remove the unused pods.

4. Click Done.
