

Clearance for Maintenance Work

- ✓ Complete this form before any maintenance work on fittings and fixtures that are directly involved in radiation work, i.e. that have direct contact with radioactive substances, such as sinks, etc. as these could be contaminated
- ✗ This form is not needed for regular maintenance work on fittings and fixtures that do not come into contact with radioactive materials (e.g. lights).
- ✓ A member of the Radiation Safety Committee (RSC) must determine that apparatus is locked off, substances are shielded and any radioactive contamination has been removed. They can give clearance by signing this form or by email. See the [Membership Information page of the RSC website](#) for member contact details.

1. Facility details

Name of Radiation Facility		
Building and rooms		
Facility Manager		
Signature		Date:

2. Clearance details

Full name/s		
Role		
From	Date:	Time:
Until	Date:	Time:
Work to be performed		
Summary of induction given		
Signature/s		Date:

(Technician's signature can be obtained on the day of service, after RSC approval)

3. Radiation Safety Committee approval

Comments		
Signature/s (or attach email approval)		Date:

(Note: Retain copy with laboratory records)
