

Issue #02

8 January 2024

Happy New Year and welcome to our latest update on the Brightspace LMS transition at Charles Sturt. As we continue to configure the system and progress the project, it's important to stay informed about the evolving features and activities. This newsletter is designed to provide you with the most recent updates as we progress our transition to Brightspace

What's New in Brightspace?

- The Subject Outline tool integration is now moving into production. This will enhance your course management experience.
- Sandbox access is now available by request. To get a hands-on feel for Brightspace, log a request to practice through the [Staff Service Centre](#).

Training

Training has commenced for subject convenors nominated to ensure subject site content is set up correctly, ready for learning and teaching. This training will continue next year, as subjects sites are migrated and ready for review.

In January we will commence our ENGAGE training for all academic and teaching staff looking to get the most out of Brightspace. This training is also available to professional staff in admin and support roles for teaching and learning.

Training sessions are now bookable online via our LMS Webpage on the button below. We will be adding more dates in the new year.

Join a Brightspace training session.

Join one of our workshops to explore ways to prepare your subjects for teaching.

Updated Website

We have made some key changes to our LMS website, including improving the layout and providing more information on training. The site will be regularly updated with information regarding key dates, learning resources, training sessions, FAQ's and more. You will even be able to find our regular communications, like this email, on the site.
