University

Study information and library studies

Inspire and share knowledge

Charles Sturt University has more than 50 years' experience in educating and training information professionals.

We're committed to equipping graduates with the knowledge and skills to create, organise and lead in a dynamic information landscape.

Learn from experienced, well-connected academics who are experts in the field. Engage with students and information professionals nationally and internationally and grow through an enriching learning journey that expands your perspectives and skills. Charles Sturt's School of Information and Communication Studies is a proud member of the international iSchools organisation – a global consortium of more than 120 universities committed to advancing information research and education.

Our courses are developed with the:

- Australian Library and Information Association (ALIA)
- Records and Information Management Practitioners Alliance (RIMPA) Global
- Australian Society of Archivists
- National Archives of Australia
- National Film and Sound Archive of Australia.

With strong ties to industry and active engagement with our partners, you'll be well-prepared to influence best practice and thrive in today's information professions.

Delivered fully online, our courses are flexible and accessible – allowing you to study full-time or part-time from anywhere in the world and fit university around your life.

Courses

ALIA accredited courses:

- Bachelor of Information Studies
- Master of Information Studies (with specialisations)
- Master of Education (Teacher Librarianship)

RIMPA Global accredited courses:

- Bachelor of Information Studies
- Master of Information Studies (with specialisations)

Graduates of the Records and Archives Management major in the Bachelor of Information Studies or Master of Information Studies will be recognised by the Australian Society of Archivists.

Undergraduate

Bachelor of Information Studies

Gain the core knowledge and skills to work as a librarian or information professional with Australia's only accredited undergraduate degree in the field.

Majors

Tailor your studies to your career goals by completing a major in areas such as:

- Children's Librarianship
- Information Management
- Librarianship
- Records and Archives Management

Career opportunities

- Librarian (public, academic, special libraries)
- Records manager or archivist
- Information manager or services specialist
- Roles in corporate or government

Postgraduate

Graduate Certificate in Audiovisual Archiving

Learn about the acquisition, collection, history, ethics, maintenance and preservation of audiovisual materials in analogue and virtual environments.

→ study.csu.edu.au/gc-audiovisual-archive

Graduate Certificate in Data Management

Whether you're an information professional or researcher, or you just want to broaden your understanding of data management, this is the course for you. Discover fundamental principles, key concepts, tools, standards and practical techniques of data curation, management and analysis.

→ study.csu.edu.au/gc-data-management

Graduate Certificate in Digital Archiving

This course is the only one of its kind in Australia and helps organisations address a growing industry need for more skilled staff. Through this graduate certificate, you'll gain specialised technical skills to help you establish your career in digital archiving across key information institutions.

→ study.csu.edu.au/gc-digital-archiving

Master of Education (Teacher Librarianship)

If you already have a teaching qualification, this is the postgraduate course for you. Understand the evolving nature of learning needs in schools and the importance of information resources in education environments. Learn to incorporate information literacy, literature and technologies into the curriculum and build skills to develop and manage diverse hybrid library collections. Discover how to use innovation, creative organisational thinking and media tools to foster lifelong learning.

master-education-librarianship](https://study.csu.edu.au/master-education-librarianship)

Master of Information Studies (with specialisations)

Gain an understanding of how to create, evaluate, collect, organise and disseminate information across a variety of institutions, including archives and libraries. Complete a set of core foundation subjects, then specialise and broaden your professional expertise in an area that interests you.

You can also choose to finish early and exit with one of two qualifications:

- Graduate Certificate in Information Studies
- Graduate Diploma of Information Studies (ALIA accredited)

Specialisations

Applied Research

Develop advanced research skills, and design and undertake an independent research project as part of your degree. This specialisation also provides a pathway into PhD study.

Children's Librarianship

Support the learning and information needs of children and young adults in public libraries. Explore their literature, and develop and implement tailored collections, services and library programs.

Data Management

Develop your skills in the planning, infrastructure and governance of data. Consider a range of issues related to data handling, including privacy, security, data preservation, storage and distribution.

Information Management

Analyse, evaluate and contribute to the development of systems to organise and retrieve information, and put web accessibility and user experience at the core of your practice.

Leadership

Gain the advanced knowledge required for successful leadership in the information industry – from marketing and human resource management to project management and program design.

Librarianship

Develop the knowledge, skills and strategies to become a leader in the information and library sectors. Learn everything from preservation and curation to digital archiving and community engagement.

Records and Archives Management

Learn the technical and managerial skills to create and maintain effective records and archives across organisations, including classification, record keeping, preservation, access frameworks and digital technologies.

→ study.csu.edu.au/master-info-studies

Doctor of Philosophy (PhD)

Be part of the largest and most influential team of library and information science researchers in Australia. Alongside expert academics, you'll investigate and seek solutions to one of a wide range of enquiry-driven, real-world problems, across several information contexts and populations.

→ study.csu.edu.au/dr-philosophy-arts-ed

Need to upskill in a specific area?

Consider single subject study, which allows you to enrol in individual subjects from across our programs.

→ study.csu.edu.au/single-subject

'Studying at Charles Sturt has made the path to becoming a teacher librarian feel achievable. The course has not only highlighted the significant impact teacher librarians have within a school but has also helped me become part of professional networks that have continued to support my growth and confidence as I step into this role.'

Aaron Partridge
Master of Education (Teacher Librarianship)
