RESEARCH STUDY

THE CONCUSSION CONVERSATION: PRACTICES AND PERCEPTIONS IN COMMUNITY SPORT

Concussion and the impact of concussion is a regular headline. We are undertaking a research study on the attitudes, knowledge and experience in concussion in community sports clubs. Your participation can really help!

What does the study involve?

Survey: Complete a short, online, anonymous survey sharing your understanding of concussion, concussion practices, your personal experience with concussion and knowledge of your club's concussion policy and protocols.

AND/OR (if you're up for a chat)

Short Online interview: to further discuss your thoughts and experiences. This is deidentified - your responses cannot be tracked back to you.

Who can participate?

Players, coaches, and trainers who are over 18 years of age

Why participate?

To provide insights into the understanding of concussion and current practices around concussion management in community sport.
