Celebrating
30 years in 2019

Things we'll cover today:

...no really, we're aiming high

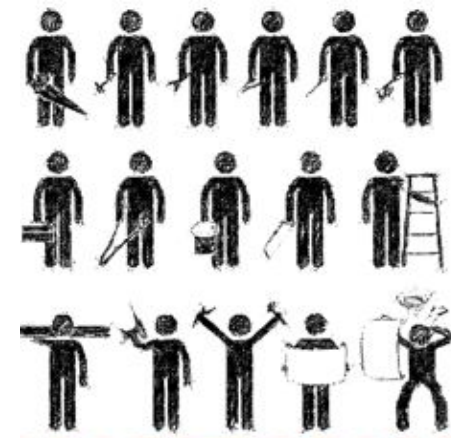

- Explanation - CSU Replay vs Panopto?
- Exemplars (who's doing what with panopto @ CSU?)
- Adding Panopto to my subject
- Tool Walk through - the Panopto interface
- The Panopto 'back end'
- Sharing (linking, embedding & 'mashups')
- Assessment & Panopto
- Q&A

CSU Replay VS Panopto

..can someone please explain this to me?

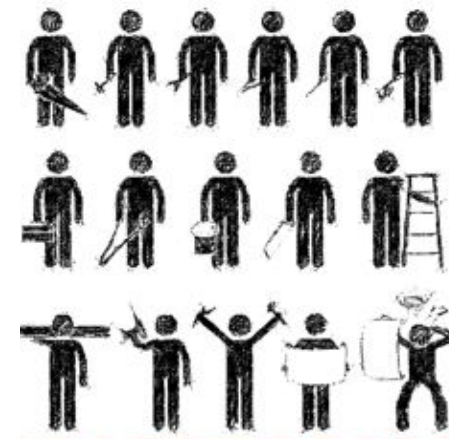

- CSU Replay - official tool title for whichever lecture capture product CSU has in place at any given time
- Panopto - video capture, creation & distribution tool
- available as a 'tool link' in all subject and org sites in i2
- involves 2 elements: the 'recorder' & 'storage locations'

3 Questions

..to save you a lot of time in the long run

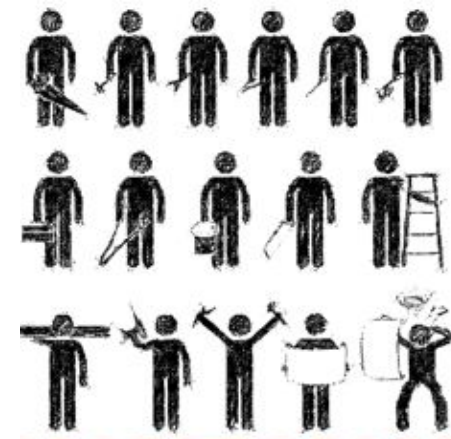

1. Where do you want your video to go?
2. How long do you want it to be there?
3. What do you want it to look like?

Exemplars

..no academics were harmed in the making of these videos

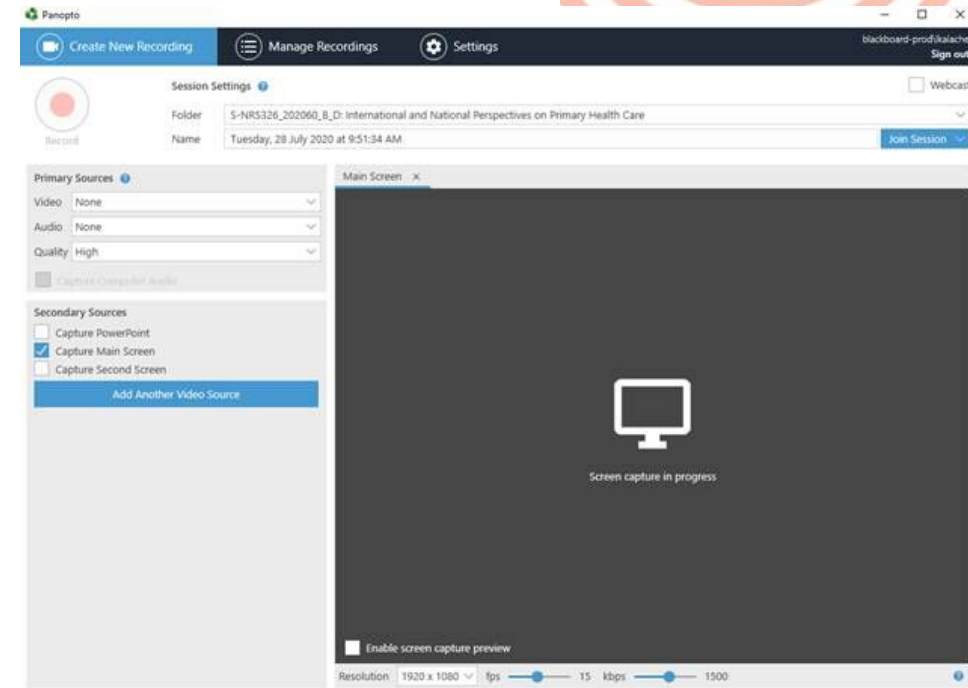

- MGM501 - Assessment Scaffolding
- CSU Pathways - Enrolling in subjects
- ADV105 - Pre-recorded concept lectures
- LAW114 - 2160 A3 - scaffold resource for assessment
- LAW217 - 2130 A1 - Assessment feedback (cohort)
- LAW309 - 2230 'Orientation' + Subject-level Panopto folder - (then topic level vids)
- AHT101 - Field Trips + prolific use of the platform

Tool Walk-through

..time to get your hands dirty

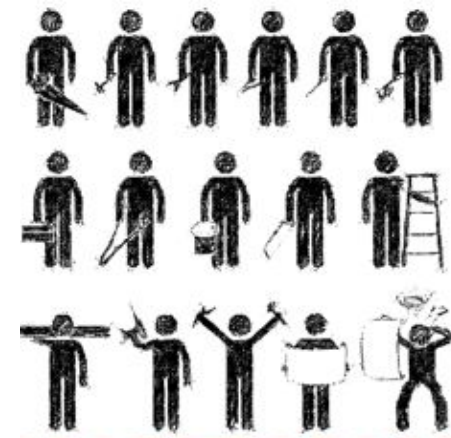

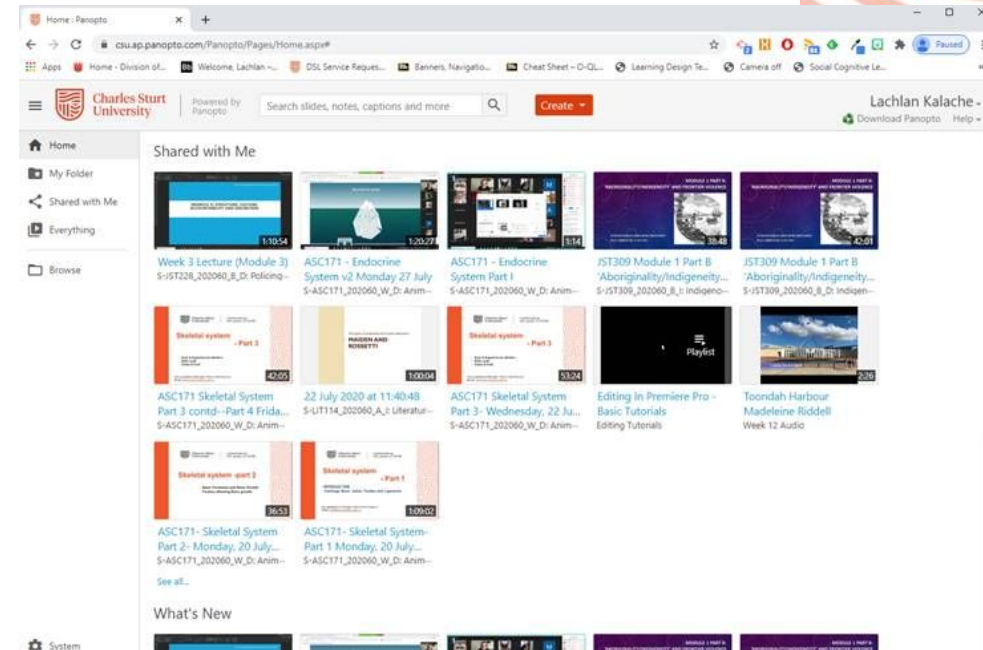

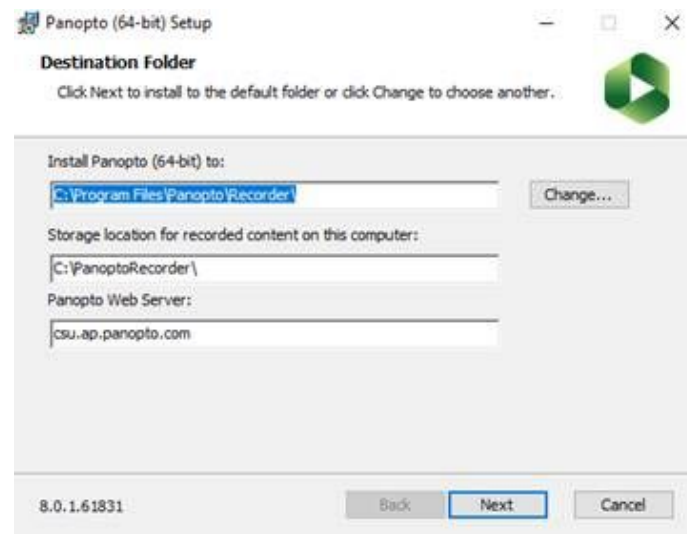

- adding the Replay tool to your subject site (every session)
- installing the Panopto recorder
- the recorder interface
- creating your first audio / video resource
- quiz tools
- publishing, editing (cropping), tool stats
- sharing (linking, embedding & subscribing)

The Panopto 'back end'

[..https://csu.au.panopto.com](https://csu.au.panopto.com)

- recording locally - 'offline' & 'my folder'
- easily move media around all of your folders
- a permanent home?

Sharing Your Resource

Linking, Embedding & 'Mashups'

Linking (CSU Replay Folder)

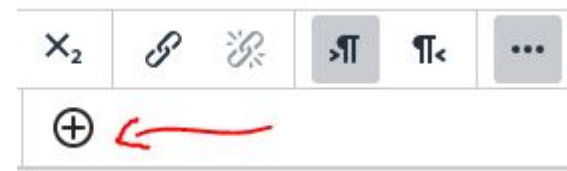

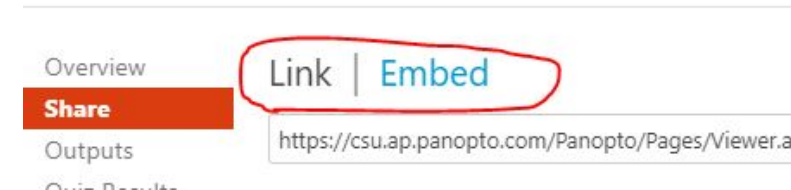

- quick and easy, share the hyperlink → done
- opens the video in browser → viewable + downloadable

Embedding

- requires embed code
- useful in i2

Mashups (now just a '+' sign)

- accesses your entire Panopto library
- end result = embedded video

SlideShare Presentation

Assessment & Panopto?

..sure you can..but should you?

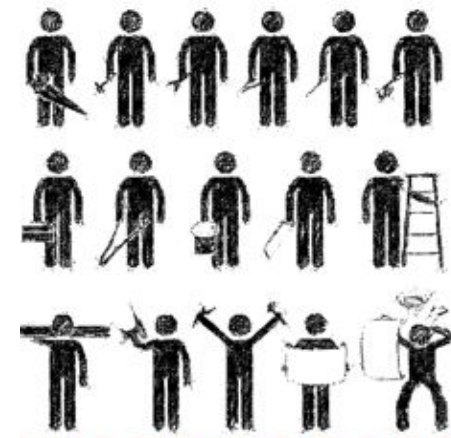

- The Panopto 'Assignment' folder - where's yours?
- creation / media uploads
- connection to other i2 tools (i.e. grading & feedback, peer commentary?)
- your experiences?

Tips n Tricks

..you will be invoiced shortly for these at the standard rate.

- beware the annual panopto purge (generally around August)
- always think about ongoing use of the resource
- avoid capturing .ppt slides as a source (just share your screen)
- Panopto chief benefit is ease-of-use and direct additions to your subject sites
- as a general rule - always start in the replay folder of the subject where you want the resource
- avoid the 'webcast' tool (unless you're good with time travel)

Additional Resources

..a few to get you started
