

Headcount for Students in Equity Groups

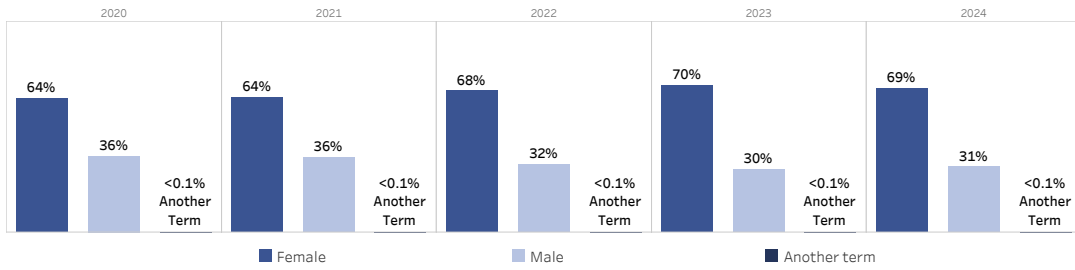

The Headcount for Students in Equity Groups shows the yearly proportion of students who belong to one or more key equity groups. These groups include students that are from low socioeconomic locations, from regional and remote locations, identify as First Nations, have a disability, or are women or identify with a gender other than male or female.

Charles Sturt Admissions Data

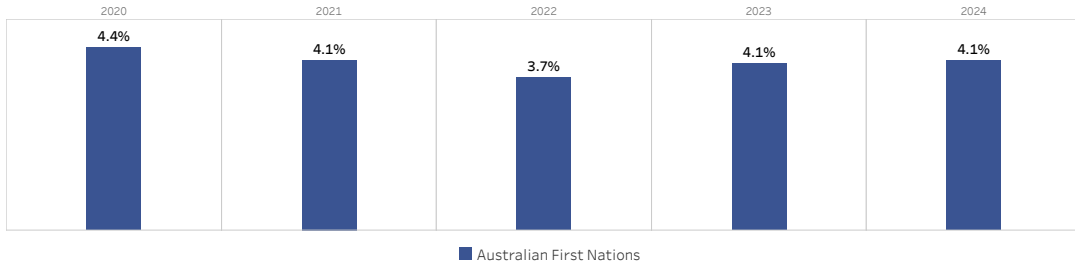

Offers Sent by Gender

The Offers Sent by Gender chart shows the yearly proportion of applicants that received offers reported as Female, Male or Another Term.

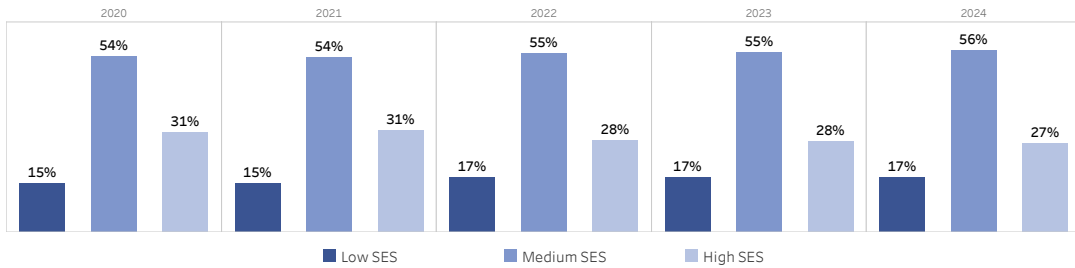

Offers Sent by Student First Nations Status

The Offers Sent by Student First Nations Status chart shows the yearly proportion of domestic applicants that received offers by Australian First Nations status.

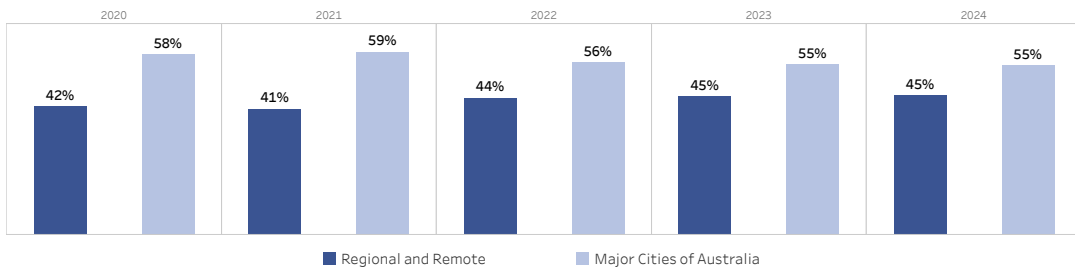

Offers Sent by Student Socio Economic Status

The Offers Sent by Student Socio-Economic Status (SES) chart shows the yearly proportion of domestic students classified as Low SES, Medium SES, or High SES. Our SES data, based on postcode information, provides valuable insights but does not fully capture the number of Low SES students as accurately as the government's street-level methodology. As a result, this chart currently underrepresents the true number of Low SES students.

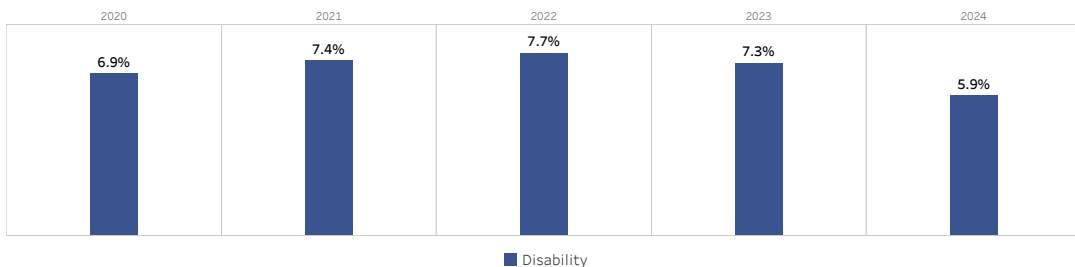

Offers Sent by Student Location

The Offers Sent by Student Location chart shows the yearly proportion of domestic applicants that received offers in Regional/Remote Locations or Major Cities of Australia. Location information is based on the student's reported residential address.

Offers Sent by Student Disability Status

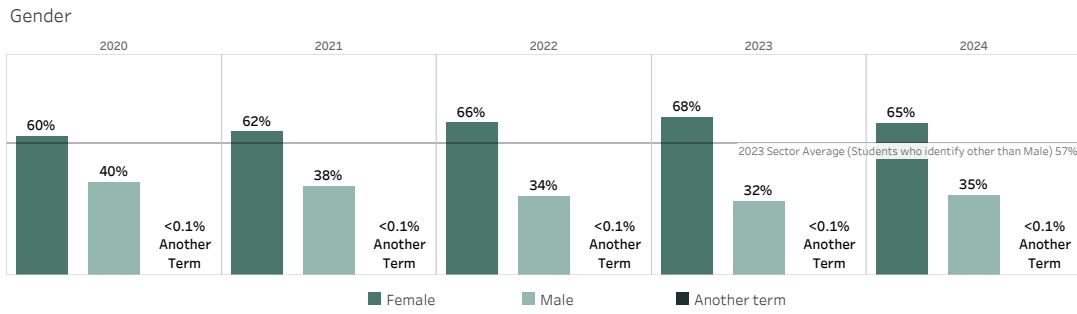

The Offers Sent by Student Disability Status chart shows the yearly proportion of applicants that received offers with and without a reported disability.
