# Cyber and Software Summer School

Join us for an immersive summer school experience on the stunning Mid North Coast of Australia!

Hosted in Port Macquarie, these 2-week intensive programs are designed for international students with two streams available to choose from – Cyber Security or Software Security. Through hands-on labs, expert-led workshops, and real-world case studies, you'll gain practical skills in threat detection, ethical hacking, and securing digital infrastructure. Enhance your global perspective, build industry-relevant skills, and explore Australian coastal life in the beautiful coastal location of Port Macquarie!

## Option one

### Cyber Security

Ready to become a cybersecurity expert? Join our summer school to master cyber incident response and forensic analysis.

In this program, you'll learn to:

- **Understand key concepts and tools** for cyber incident response.
- **Detect, contain, and mitigate cyber incidents.**
- **Develop and implement tailored incident response plans.**
- **Respond to various cyber incidents** like malware, data breaches, and DDoS attacks with practical guidance.

## Option two

### Software Security

Security is essential in today's digital world! This course empowers you to become a developer who builds secure, resilient, and trustworthy systems from the ground up.

In this program, you'll learn to:

- **Integrate security** into all development phases using SSDLC principles.
- **Master industry tools** for real-time vulnerability detection and protection.
- Streamline development and security with **DevSecOps practices.**
- **Explore advanced topics** like container and Linux security, open-source risk management, and continuous security monitoring.
