

PebblePad and Brightspace Integration (LTI 1.3)

What does the PebblePad-Brightspace integration actually do?

Quick answer:

The PebblePad LTI 1.3 integration connects a **Brightspace subject to one PebblePad ATLAS Workspace**.

It provides students and staff with access to PebblePad from Brightspace, passes enrolments to the linked Workspace, can launch linked PebblePad activities, and can return one final assessment grade to the Brightspace Gradebook.

It is not a full synchronisation between Brightspace and PebblePad. Dates, groups, extensions and most assessment administration still need to be managed in the appropriate system.

At a glance:

The integration DOES	The integration DOES NOT
✓ Provide single sign-on access to PebblePad/ATLAS from Brightspace	✗ Synchronise assignment due dates
✓ Link staff and student enrolments to one ATLAS Workspace	✗ Synchronise special access or extension dates
✓ Allow linked assignments to open a PebblePad resource/template and prompt submissions to ATLAS	✗ Automatically unlink the Workspace if the LTI link is deleted from Brightspace
✓ Return one final assessment grade from PebblePad to Brightspace	✗ Pass Brightspace Gradebook columns into PebblePad assignments
✓ Link directly to PebblePad resources from Brightspace	✗ Synchronise manual enrolments
✓ Allow Brightspace groups to be transferred to PebblePad sets	✗ Synchronise LMS-side grade overrides

Important to know:

- One final grade can sync from PebblePad to Brightspace.
- Check the automatically created Brightspace Gradebook column before releasing results.
