Accessing your Email Off-Campus

When you are away from the CSU Campus and you wish to view your email you should use 'Weboutlook'.

This is a web-based email program very similar to your Microsoft Outlook program which you use on campus.

You can access Weboutlook through the 'Weboutlook' link under IT Services within the 'Quicklinks' section of my.csu.

If you have previously bookmarked the link and it does not work you may need to type in the following url: https://weboutlook.csu.edu.au/owa/

You will not be able to view your archived .pst emails files via weboutlook if you have saved them locally at the university, ie. If you have saved them to your C or D drives.
