

Teaching Software

I need software installed in Computer Labs and on Public Access Computers

From time to time Academic Staff would like some different software installed on computers which students have access to and use for study purposes.

If you are an Academic Staff member and would like to see a specific software program available on the University Computers for student use then you can lodge a request by going to the 'Computer Laboratory Software Request Form' on the 'Quick Links' area on staff.csu under 'IT Services'.

Or just contact the IT Service Desk on ext 84357
