See information about workshop below:

Academics have long lived with the pressure to publish or perish. Getting published in high quality peer reviewed journals is required not only for landing an academic position and getting promoted, but even for keeping your job. Increasingly, Higher Degree by Research students are also expected to publish high quality research arising from their masters or doctoral thesis.

Over three consecutive days in the last week of November and a follow-up two days in the first week of December, Ron Adams will run an intensive workshop for academic staff and HDR

students who want to get published in peer reviewed journals. The workshops on 27, 28 and 29 November will cover why it's important to publish, the different forms and quality of publication, how the peer-review process works and what journals look for. They will also provide practical strategies for getting published, including: planning an article using the 'tiny text' framework, writing first drafts using the Pomodoro Technique and reviewing what you write using the *Demystify Your Thesis* dot point strategy. During the workshops, participants will develop a personalised 'toolkit' for writing a journal article, which they will apply over the next few days for drafting an actual article, before coming together on 2 and 3 December to review and revise their drafts in an intensive, hands-on workshop.

**Professor Ron Adams** has worked closely with CSU's Faculty of Arts and Education over the past four years. Professor of Graduate Research Training at Victoria University and Adjunct Professor in the Graduate Research School at Edith Cowan University, Ron is the recipient of many teaching and research training awards, including the peak Australian Learning and Teaching Council Award for Postgraduate Education for his *Demystifying the Thesis* suite of programs.
