Subject: What's New in Brightspace - May 23, 2024 (Form to Provision Subject Sites, Key Dates + more)

Issue #06
23 May 2024

Dear colleagues,

As site provisioning gets closer for Session 2, we want to ensure a seamless experience for everyone. Preparation is also underway for staff and students transitioning to Brightspace in Session 2/60. If you're already using Brightspace or preparing to move over soon, the following updates and information will be helpful.

New features

New features in Brightspace include:

- **Form to Provision Subject Sites:**
 - A new form has been created to provision subject sites. This will automate and streamline the process of provisioning new sessional subject sites in Brightspace. Subject Convenors and Heads of School can use this form and access it from the 'My Subject' area of the nav bar.
- **Display of student ID:**
 - The student ID will now be displayed in the Gradebook and Classlist.

Key Dates and Communications Packs

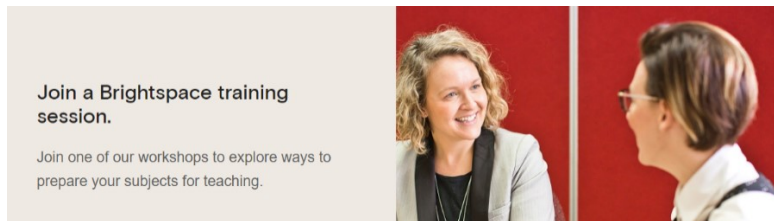

Keep across upcoming key dates and milestones, such as site provisioning and subject outline publishing in our online packs [here](#).

- Communication: [How the LMS project is talking about the changes to staff and students](#)
- Migration: [How we're migrating subjects, key dates and information about roles](#)

- Students: [Resources to help you communicate with students](#)
- Support: [Quick help links and extra learning resources](#)

Additional Training

As we get closer to learning and teaching in Brightspace for Session 2/60 we're increasing training and support. Workshops are available to [book via our website](#). You can also see the recordings [here](#) to learn at your own pace.

Brightspace Learning

The LMS Implementation [web page](#) is constantly refreshed with resources to assist you with things like migration information, key dates, FAQ's and more.

Web articles for Brightspace help are available [here](#).

Further Support

As normal, please lodge any Brightspace technical or site migration issues [through Cherwell](#).

Regards,

The LMS Project Team
