# A postgraduate qualification to boost your career

Investing in yourself with a postgraduate qualification will be one of the smartest moves you'll make. It'll ultimately benefit you, your family, your career and your community.

And a postgraduate degree makes a big difference to your earning potential.

In 2020, median salaries for workers with postgraduate qualifications were more than \$22,000 higher than those with undergraduate qualifications. Postgrad coursework graduates earned \$87,400, while postgrad research graduates earned an average wage of \$93,000.

When you study with Charles Sturt University, you're studying with the uni with the highest graduate employment rate in the country. Put simply, more Charles Sturt University grads get jobs faster than grads from any other uni.\*

One of the main reasons Charles Sturt grads get jobs is because we collaborate with industry organisations to design our courses. It means our qualifications – your next degree – meet the current and future needs of their professions. And these organisations accredit our degrees to reflect that commitment – from the Council of Ambulances Authority to the Australian Computer Society.

Our academics know what it takes to succeed. They are tuned in to where their industries are heading in the future and, in many cases, come from industry.

That forward focus is what underpins all of our courses, teaching and research. Our academics know how best to share their expertise and make your study relevant, engaging and challenging in the best way.

It's why Charles Sturt University was a finalist in the latest Global Teaching Excellence Award.

## Did you know?

Our Graduate Certificate in Community Leadership and Resilience empowers you to help communities overcome challenges, disruption and adversity.

# Study that works for you

Choose from more than 200 postgraduate courses at Charles Sturt University – all available online. We also offer select courses on campus if face-to-face learning is how you want to learn. It means you can learn when and where suits you, and get qualified to make your next career move count. Your busy life doesn't stop, so at Charles Sturt we make it easier to juggle your commitments, with everything you need for your course online.

We know things can change. Life is more hectic at some times than others. So as things change, you can modify your study to fit them. Take extra subjects when you have a bit more time. Scale back to one or two when things are busier. You can even study over the summer to get ahead.

You know where you want to take your career next. With us, you have the opportunity to build the course that will get you there. Combine subjects from different areas and select from a range of elective subjects. You might be studying comms but also want to gain an understanding of your audience's mindset with a psychology subject. You can, here. Or you might want to complement your IT studies with some management skills to help you run your future business. No problem. It's your degree, done your way.

# Postgraduate study is online study

Charles Sturt is Australia's most experienced online university.

More students choose to study online with Charles Sturt than any other uni in Australia.\* There are around 25,000 studying online with us right now!

We put everything in place to enable you to advance in your industry, diversify your expertise or start your next career – all from the comfort of... wherever you like. Everything you need is online. Lectures, tutorials, assessments, resources and community spaces.

And our help is online too! We provide help over the phone and in person. You choose.

Tech issues won't get in your way when you study with Charles Sturt. IT support is available 24/7, 365 days a year – and it's just a phone call away.

Just because you're studying online doesn't mean you're studying alone. Far from it.

At Charles Sturt you'll have plenty of opportunities to build the deep connections that are central to your study. Connections with your tutors, lecturers, fellow students and industry that will last a lifetime.

And it's easy. Join your courses Facebook, Insta or online groups. Or reach out and build your own networks – we'll be right behind you if you need us.

After all, you'll be part of our Charles Sturt family.

"I really believe in public education. I believe in what it can do for society. The role of a teacher is to make life better for people. To give every child the best support and every learning opportunity that they can. Even though I was considering changing my career, I wanted to continue to be a part of the great public education system we have in Australia. That was really important to me."

Sally Dare is a primary school teacher of 14 years. She loves teaching. But she also loves learning. She began to wonder if classroom teaching would continue to fulfil her as she grew older and more established in her career. So she started to consider what the next step could be. Hear from Sally about how she chose to study a postgraduate online course with Charles Sturt University to take her career down another path.

**Sally Dare**  
Graduate Diploma of Psychology

## Weighing up options

Throughout my teaching career, I had often seen students supported by specialist teachers and school counsellors. I also really appreciated the assistance and guidance that I had been given along the way by different people. So when I first started to think of a different work life, I thought *How can I be like them? How can I apply the skill set I already have to a different career path in education?*

I began to reach out to people in my network, particularly school counsellors, to see what my future career might look like – and psychology seemed like a good fit.

## Time for a change

Originally, I thought I would learn better in a face-to-face, on-campus environment. But then I discovered the Graduate Diploma in Psychology (a 100 per cent online course) – and I changed my mind. It became very clear that this course was made for me and my situation. It felt like the product had been tailored specifically for me, and I couldn't go past that!

After not studying for very time long time, I thought I was going to be very out of touch. I was told about Charles Sturt's Study Link subjects – short, online courses aimed at brushing up your study skills before your classes begin. There are lots of different subjects on offer – from how to use the library, to essay writing and referencing. I did all of them! And I felt better prepared for study generally by doing so.

## Exploring online study

When you study an online course, you can play to your strengths – and build a schedule that suits your situation. I can study when I want. I can do as little or as much as I like. It's all my choice.

All the things I was scared about... have actually been fine. I was stressed about the actual study part of my degree, as well as money and balancing work and life. But everything has worked out well. I know in the back of my mind that I'm working towards something that will benefit me in the long run. The other part is: now that I'm older, I know that I really want this. I want to be a psychologist, and I want to be as prepared as I can be for that career path.

# Choose how far you'll go

What's right for you?

We have different types of postgraduate courses so you can find the right level of study for your career goals.

## Micro-credentials

Our micro-credentials are designed to help you make a difference. Ranging from two to four points, a micro-credential lets you gain the skills you need in a fraction of the time it takes to study a single subject or full degree. You'll be on your way to creating your own qualification in no time at all.

## Single subjects

Dip your toe into university study or gain knowledge of a particular area to boost your career. Study a single subject (or two!) to hone a new skills or get back into the groove of studying. The best part? Single subjects count towards a related degree. It's a win-win.

## Graduate certificate

Open up a world of opportunity with a graduate certificate. Typically, in the space of six months to a year, you'll get advanced knowledge and an admission pathway to your future postgrad study. What are you waiting for?

## Graduate diploma

Take on your next step in postgraduate study after completing your graduate certificate. Sometimes this qualification is available to you if you don't have a bachelor's degree but have relevant work experience.

## Master's degree

Give yourself a competitive edge with a master's degree. You can study your master's by coursework to delve into advanced critical analysis of your chosen subject and become the specialist you want to be.

## Higher Degree by Research

Whether a master's by research or a PhD, you'll add new knowledge to your area of interest through original research. Make new discoveries and undertake groundbreaking work, opening up opportunities in academia, research and policy.

Don't forget, when it comes to your study, you're in control. You can study full-time, part-time or alter your study schedule throughout your course if your circumstances change.

## How long does postgraduate study take?

If you study full-time, these are the typical durations for postgraduate study.

- Micro-credential – 8 weeks
- Single subject – 16 weeks
- Graduate certificate – 6 months
- Graduate diploma – 1 year
- Master's – 1.5 years
- Doctorate – 3 years

# Flexible study – you're in control

Everyone has different priorities; demands on their time and responsibilities they need to take care of. We get that. It's why we put flexibility at the heart of postgraduate study. But what do we really mean when we say flexible study? Well, it's about three main things.

## Choose where and when you study

Our postgraduate courses are all available online, and everything you need is there at the click of a mouse. So you can study wherever suits you, and when it's most convenient in your schedule. Early riser or night owl – with 24/7 access, recorded lectures and round-the-clock support, you can choose your **ideal study time**.

## Start when you're ready

When you're ready, we're ready. At Charles Sturt we have multiple start dates across the year for you to begin the next step of your study journey. So you can find one that's right for you and your family. You can start most postgraduate courses in February, July or November. Select courses also have more start dates – we call the micro-sessions – dotted through the year. So depending on your course, you could also choose to start in January, March, May, June, August or October.

## Change if you need to

You can choose to start your course full-time or part-time. You can also start with a single subject and build from there. The key thing to remember is that we know life has a habit of changing. So at Charles Sturt, you can change your study schedule to accommodate it. Got some clearer road in front of you? Take on an extra subject or two. Life looking pretty full? Scale back to just one or two subjects. It's your course, done your way.

# Upskill – and futureproof your career

## Upskilling: what is it and how can it help you?

You want a fulfilling – and sustainable – career. How can you achieve that? The answer is ongoing skill development. In a word, upskilling.

Upskilling refers to learning new skills to improve your performance – and possibilities – in your current career. Continual skill development is a necessity in our changing world of work. But there's also a lot in it for you personally.

For instance, upskilling could make you more secure in your role. After all, if you're always staying at the cutting edge of your industry, and learning the latest skills and knowledge, your employer is going to recognise your value. You'll be the one driving innovation and performance.

Upskilling could also mean you move on – and up – from your current job. More skills, newer perspective, extra qualifications – these are exactly the sort of things that make a candidate stand out when applying for a job.

## Top five reasons to upskill

1. Job security: upskilling can give you the skills and knowledge to futureproof your career in our changing world.
2. Promotion: gain the advanced theories and practical experience you need to get the job you really want.
3. New opportunities: having new skills opens up a world of possibility and opportunities in new areas for you to explore.
4. Getting a raise: having a postgraduate qualification means you'll have the credentials you need to earn a higher salary.
5. Job satisfaction: specialise in an area that you truly love when you align your skills to your career goals.

The good news? Upskilling can be a small step – a short course where you could study a micro-credential or single subject. If you want to delve a bit deeper, you could study a graduate certificate in as little as six months.

## How do you start upskilling?

You don't need to reinvent the wheel when you upskill. Upskilling lets you build on your existing knowledge base to keep yourself at the cutting edge of your industry. If you're looking for a career change, there's always the option of reskilling too. Reskilling lets you develop a set of brand new skills so you can tackle those uncharted waters and try out that new career you've been thinking about.

# Affordable study to meet your goals

At Charles Sturt University, we don't want the cost of study to hold you back. We'll help you navigate the finance initiatives that can help you pay for your studies.

### Did you know?

You can save up to 80 per cent on select graduate certificates in 2021.

Ask us how or visit [study.csu.edu.au/graduate-certificate](https://study.csu.edu.au/graduate-certificate)

## CSP

Some postgraduate courses have commonwealth supported places (CSP), which means the government pays a percentage of your fees. Chat to us to find out if there are CSP for the course you're interested in.

## Tax deduction

If there's a direct connection between your study and your work, you may be able to claim your tuition fees as a tax deduction.

A tax agent, financial adviser or the Australian Taxation Office can guide you on educational deductions.

## Scholarships and grants

Did you know we offer more than \$3 million in scholarships and grants at Charles Sturt? Don't rule yourself out of the running, there's an extensive range of scholarships and grants on offer.

Many scholarships get left on the shelf because people assume they won't get one, so they don't even apply. Trust us, it's worth your while to apply – for as many as you can.

## FEE-HELP

You may be eligible for FEE-HELP when you study one of our postgraduate courses. FEE-HELP is a government loan that, if you're eligible, you can use to pay your tuition fees, by deferring payment until you earn a certain amount.

## Get a discount

Did you know that if you're a Charles Sturt alumni, you'll receive a 10 per cent discount on the cost of your course? How great is that?

Need advice about the cost of returning to university?

Call us on 1800 275 278.  
We'll work it out together.

# Extra study support – and it won’t cost you a thing!

## Study Link

Study Link will make your transition to university a little easier and give you the confidence to succeed.

Study Link subjects are short, self-paced, non-credit bearing courses. You can brush up on writing, maths, statistics, and science or information technology. Supported by a real person (your subject coordinator) you can work your way through at your own pace (take up to five months if you need to).

## Academic Skills team

We have a team of professionals who are ready to help you hone your academic writing and put together an assignment.

Reach out and they’ll support you with one-to-one consultations and assignment feedback and steer you in the direction of workshops that may also be of benefit.

## Individual support

Whether you’re in your first session of study or your last year with us, we’ll have your back.

Individual academic skills support is available when you book a 30-minute appointment. It can be face-to-face, via Skype, phone, online or through email. Whatever works for you.

Whether its getting to grips with academic writing again, or building literacy or numeracy skills, we can help – and our advisers can even design you an individual learning plan.

## Built-in help

Did you know that we are also embedding academic skills help into most of our courses? That means the help you’re after is actually delivered as part of your course – it’s built-in to your workload and time frame.

For example, if a subject requires you to write an academic report, it’s likely that guidance or a workshop on doing just that will be part of the subject’s workload.

## Assignment feedback service

Want better marks? We can help you get there.

Connect in real-time with the experts at Studiosity – they’ll give you direction on your academic writing.

Upload your draft assignment to Studiosity and tell them what you want guidance on – like referencing, spelling, grammar or sentence structure. They’ll give you feedback and some advice on things you can do to improve. And they’ll usually come back to you within a few hours!

In one year our students uploaded more than 19,000 assignments for feedback! That’s a lot of help.

## Online discussion forum

Got a question about academic writing? Not sure about a tricky reference? Ask an academic skills adviser by posting your question on our online forum.

The forum is checked seven days a week and you’re guaranteed to get an answer within 24 hours. (Mostly it’s much faster than that!)

Many times someone else has already raised the question – so plug your question into the forum, use the subject number and find the answers you seek!

## Online workshops

We also have a suite of online workshop resources specifically for our postgraduate students. Available anytime, these sessions will equip you with valuable information, tools and tricks on essential topics, such as critical thinking, time management, proofreading and academic reading.

Bonus – when you accept your Charles Sturt postgraduate offer, you’ll be enrolled in our free short course, Introduction to Learning Online.

If you’ve never studied online before, this course will cover everything you need to know.

## Library resources

When you study online with Charles Sturt, you’ll have an around-the-clock pass to our full library of ebooks, eJournals, encyclopaedias, multimedia resources and course readings. You can also order any books to be delivered by post free of charge. When you’re done, just pop it back in the mail – the return postage is on us too.

We even have our own library YouTube channel to guide you through all you’ll need to know!

Discover a range of information sources and learn how you can use them for your studies.

Take a virtual tour of our campus libraries and check out our range of ‘how to’ guides that can help you navigate our online resources.

# Other ways we can help

You can access a range of support services to ensure you get the absolute most out of your time at Charles Sturt University – and beyond.

## 24/7 IT support

You won't need to worry about any tech issues, with IT support available round the clock.

## Career advice

Get set to get that job when you graduate with our career advice service. Get tips on job applications, résumé writing, interview techniques and job search strategies. Take part in career development workshops.

You can even chat to a career development officer.

## Health and wellbeing

Reach out online or over the phone to our friendly team whenever you need a chat to keep things going well. We also have specialist LGBTIQ+, disability, equity, health counselling, religious and cultural support here for you.

## Finance team

Get a grip on everything dollars and cents with our friendly finance team. They can help you apply for scholarships, access government finance, and give you tips on budgeting and planning.

Plus, they can connect you with our dedicated program – Earn As You Learn – to help you find a part-time job with a local business if you want one.

“The biggest motivating factor for me returning to postgraduate study was investing in my career. In my line of work the more qualified you are, you certainly have more sway.”

## Study that fits

I worked full-time and weekends were filled with sport and driving kids around, so studying at Charles Sturt was very flexible – it suited me. If I had a busy week I could put study on hold and get back to it the following weekend.

It fit in with my lifestyle and was really the only option for me.

## Flexibility when I needed it

But the idea of flexibility went further than that. With my course, it was really flexible with exit points as well. I took a little break for a couple of years because we bought another business at work and that was hectic – so I exited with a graduate diploma.

It was the perfect way to put it on pause. Then when things got knocked into shape at work I re-enrolled in my master's and I found that everything I'd already studied counted towards that. That was brilliant.

## Hop online

Navigating online study with Charles Sturt was user friendly. I found the online platforms were easy to use compared to other websites and setups I have at work.

Everything you need is online and you soon get into the routine that suits you. I'd finish work and then do half an hour of study every afternoon. That just kept me up to speed with everything.

And the subject forums were active and engaging and that helped build connection with other students and lecturers.

**David McMahon**  
Master of Environmental Management

# Maintain your balance

## Helping your study-life harmony

It's all about balance. Study will help your career and let you pursue your passion. And with so many other elements to juggle, it's important to keep your stress levels in check.

Dr Shaunagh Foy is a registered psychologist and a student counsellor at Charles Sturt University (as part of our student support network).

Here's Shaunagh's top three tips for maintaining study-life harmony.

### Did you know?

You can upgrade your social work qualification with our Master of Social Work (Professional Qualifying) or extend your practice through our Master of Advanced Social Work Practice.

## 1. Buy-in

Once you have decided to make your next move count – and begin postgraduate study with us – get everyone around you on board.

- Discuss with your partner, children and extended family why you want to study.
- Explain the study expectations and how they will impact upon your family.
- Don't forget to also chat with your friends and employer.

## 2. Organise (and delegate)

Run a household, take care of your family, and hold down a job or two? You already know that organisation is an essential life skill.

- Offload some of your home tasks to free up some time to study.
- Know what time of day best suits you to study.
- Review your subject material as soon as it's available online.
- Plot a study schedule, with time to read, research, write assignments and prepare for exams.
- Clear your schedule around assignment or exam time.

## 3. Do

Doing something towards your course every day will help you stay on top of things and dial down your stress.

- Do a little reading.
- Make or organise notes.
- Talk to others and teach yourself.
- Check your referencing.
- Test yourself.

# Make your move

## Let's get started

Once you know where your passion lies and where you want to make a difference – the next step is easy. Tick off all of your course requirements, then applying for a postgraduate course online will only take around 15 minutes.

### Step 1

Choose your course.

→ [study.csu.edu.au/courses](https://study.csu.edu.au/courses)

### Step 2

Apply online now.

→ [study.csu.edu.au/start-your-application](https://study.csu.edu.au/start-your-application)

### Step 3

Accept and enrol.

→ [my-offer.csu.edu.au](https://my-offer.csu.edu.au)

## Using My eEquals

To make things easy you can submit documents to us via My eEquals – which is a way you can share certified, digital versions of academic transcripts and graduation documents.

Go to your previous university's website for information about obtaining your records through My eEquals or visit [myequals.edu.au](https://myequals.edu.au)

Remember, include your full name, applicant ID and date of birth with your eQual submissions – so we can attach it to the right application.

You can also submit transcripts and documents to us through the application portal, or email documents to [admissions@csu.edu.au](mailto:admissions@csu.edu.au). These should be PDF files and include your full name, applicant ID and date of birth.

Just a note, please don't try to share documents using Google Drive.

## Key dates

### Start in July 2021

Want to start studying in July? For the best chance of securing a spot in your preferred course, get your application to us by 30 April 2021.

### Start in November 2021

If you're looking to start study in November, get your application to us by 3 September 2021.

### Start in February 2022

Get organised to start study in the new year by getting your application to us by 29 October 2021.

### Did you know?

We offer micro sessions in January, March, May, August and October for select courses.

Check the online course brochures to see if you can start your course sooner.
