THE GENDERED NATURE OF FAR RIGHT EXTREMISM IN THE US AND AUSTRALIA

Definition of far right extremism....not so fast:

"While issues of terminology might sound like a purely academic matter, they are crucial to politics and the political debate" (Mudde, 2022)

Some ideologies which before 2016 may have been considered extremist have moved into the mainstream - for some people.

Key characteristics for both countries:

- Still largely on the political margins
- Believe that inequalities are natural and outside the purview of the state (Mudde, 2022)
- Hold most fascist ideologies - right on the political spectrum (Corporatism)
- Nativism - xenophobia, nationalism, racism, (antisemitism, islamophobia)
- **Have an ideology of strict gender roles - generally male dominant, generally anti-LGBTQ+**

THE GENDERED NATURE OF FAR RIGHT EXTREMISM

Why is the issue of gender rules and the control of women important to far right wing ideologies?

Project 2025 proposes reclassifying tens of thousands of federal civil service workers as political appointees in order to replace them with people loyal to the president. Proponents of the project argue it would dismantle what they view as a vast, unaccountable, and mostly liberal government bureaucracy. The project also seeks to infuse the government and society with conservative Christian values.

Critics have characterized Project 2025 as an authoritarian, Christian nationalist plan to steer the U.S. toward autocracy. Legal experts have said it would undermine the rule of law, separation of powers, separation of church and state, and civil liberties.
