

Year 1 Session 1	BIO100 Concepts of Biology	PSC102 Botany	SCI101 What is Science?	Elective
Year 1 Session 2	MCR101 Introduction to Microbiology	IKC101 OR ENM111*	Elective	Elective
Year 2 Session 1	PSC215 Plant Physiology	Elective	Elective	Elective
Year 2 Session 2	HRT202 Plant Taxonomy and Systematics	PSC221 Fundamentals of Plant Protection	STA201 Scientific Statistics	SCI201 Science in Modern Society
Year 3 Session 1	HRT301 Plant Propagation	BIO312 Landscape Ecology	STA308 Experimental Design and Analysis	Elective
Year 3 Session 2	PSC424 Advanced Plant Protection	Elective	Elective	Elective

Key Major Core subjects Elective

*IKC101 Indigenous Australian Cultures, Histories and Contemporary Realities OR ENM111 Indigenous Environmental Studies.

The Biology major allows for selection of subjects aligned with animal biology, conservation biology and/or plant biology – the subjects shown on this pattern focus on plant biology.

Most subjects have prerequisite(s) or assumed knowledge which informs the sequence in which they should be completed, as in this enrolment pattern. Check the Handbook for prerequisite(s), assumed knowledge and any course enrolment restrictions, especially for electives.

Electives can be chosen to complete a second major, from a range disciplines in the BSc, or from within the university (assuming course enrolment restrictions do not apply).

Electives must be chosen so that the overall course level requirements are met: a minimum of 48 points (six standard 8-point subjects) at Level 3 and no more than 80 points (10 standard 8-point subjects) at Level 1.
