Some reasons for studying GIS and Remote Sensing at CSU:

- You will have access to the latest software which is provided for each subject along with appropriate licences.
- Spatial science has strong employment prospects.
- You will gain technical skills in analysing and resolving complex problems that affect the health of our environment and our overall wellbeing.
What makes CSU unique?

Professionally focused: Our focus is on education programs that prepare graduates for work. We work closely with industry, professions, and government to ensure our courses meet and support industry needs. This is why CSU received a five-star rating for ‘getting a job’ under the Graduate Outcomes category in the Good University’s Guide. You will graduate with the knowledge, skills, attitudes, habits, and professional networks needed for a successful career.

Blended and flexible learning: CSU is a leading provider of flexible and online education. We have developed innovative study methods to give you the flexibility to choose when, where, and how you study. This allows you to fit study around work, social or family commitments.

A proud regional university: We are a global university focused on our regions. Being a regional university, our staff are close to the issues. CSU’s research in environmental science and management is ranked by the Commonwealth government as above the world standard.

Graduates make a difference: We develop holistic, far-sighted people who help their communities grow and flourish. We empower students with the ability to influence the world for the better.

Residential school

Some subjects, particularly those teaching technical skills, have compulsory residential schools. If you choose these subjects you will be required to travel to Albury-Wodonga Campus for two to four days to learn these skills. This provides you with the opportunity to meet other students, your lecturers and learn from real life experiences through guest lectures, hands-on study or field trips. It is possible to complete these degrees without attending a residential school.

STUDY LINK

It is important to prepare for University study and STUDY LINK is designed to help kick-start your studies. You might consider undertaking a transition to university course. For further information, visit: www.csu.edu.au/studylink

For more information or to apply, visit:
www.csu.edu.au/courses/postgraduate/gis_remote_sensing

---

I enjoyed the flexibility of studying at my own pace with online study. Subject materials were interesting and the assignments were stimulating and relevant. I was also able to enrol in modules from related disciplines of benefit to my career development.

Since undertaking the course, I have been successful in gaining employment with state government departments in various mapping and GIS roles, and within private industry processing satellite imagery.

Helen Tait
GIS and Remote Sensing graduate
